COURSE ADMINISTRATION

Welcome and Course Orientation

© 2026 Tertiary Infotech Academy Pte Ltd

Digital Attendance (Mandatory)

1

AM, PM and assessment

Complete every required SSG digital-attendance session.

2

Scan

Use the SSG QR code shown by the trainer or administrator.

3

Confirm

Wait for the successful submission acknowledgement.

4

Eligibility

At least 75% attendance is required for assessment and funding.

LEARNER INTRODUCTION

Let's Know Each Other

1. **You**
   Name, organisation and role.

2. **Your process**
   One process whose quality matters to your work.

3. **Your challenge**
   A recurring compliance or performance problem.

4. **Your outcome**
   What successful learning looks like after two days.

© 2026 Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

Ground Rules

1. **Be present**
   Return from breaks on time and complete attendance.

2. **Participate**
   Ask, challenge and contribute evidence.

3. **Respect**
   One conversation at a time; disagree professionally.

4. **Protect information**
   Use fictional or sanitised workplace data.

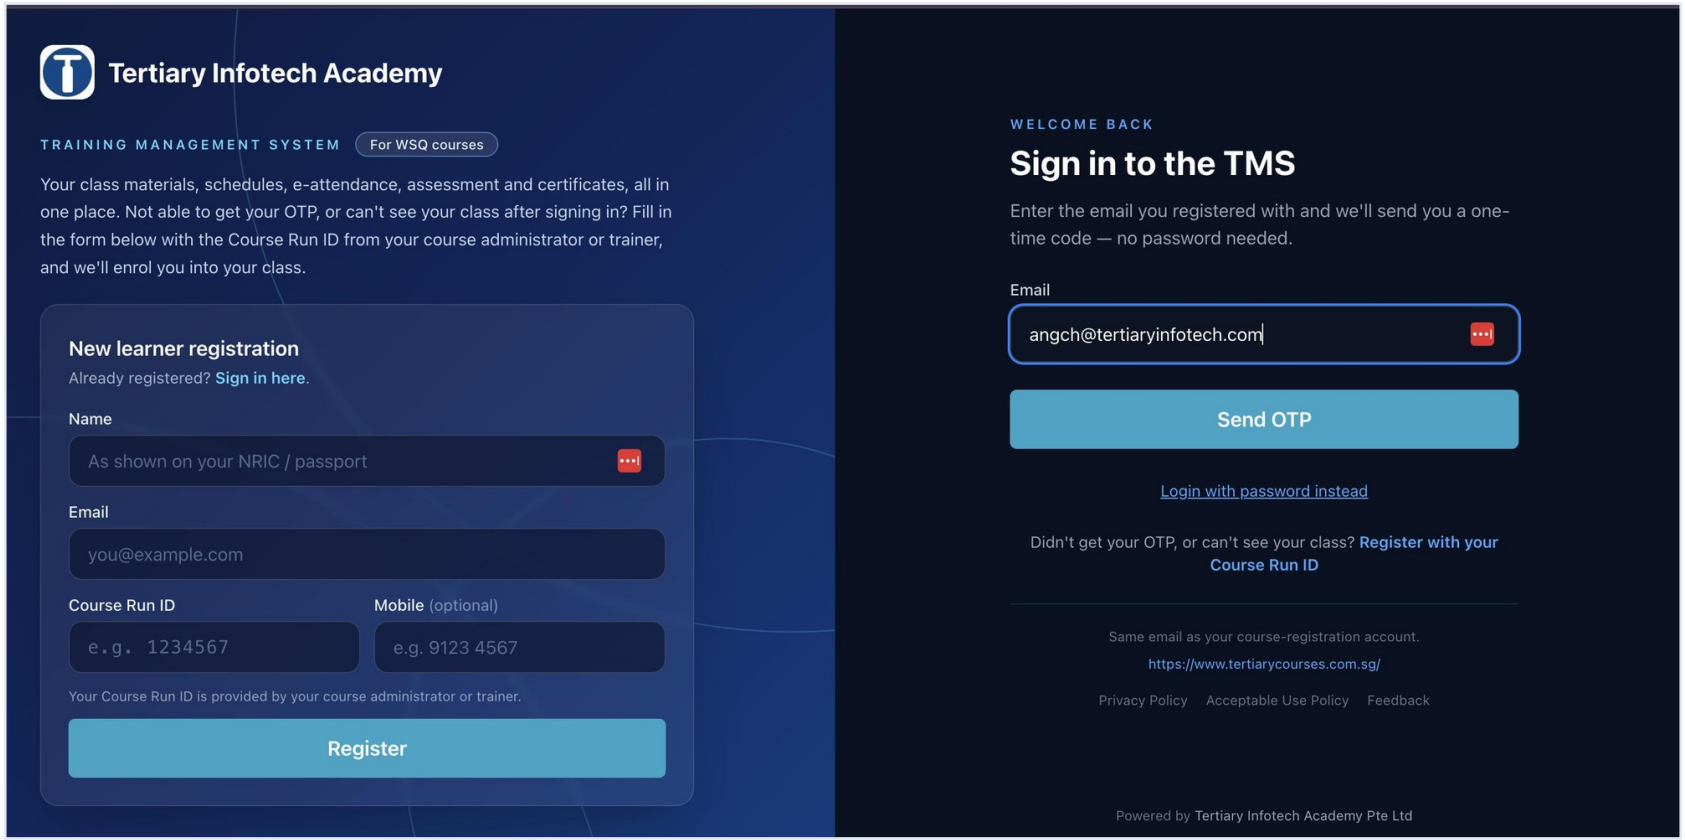

5. **Stay practical**
   Link every idea to a process or decision.

6. **Own the result**
   Verify your activity output before submission.

SCHEDULE

Lesson Plan — Two Days

Day 1

- Day 1 · QMS foundations, ISO requirements and risk-based audit planning
  - 9:00-10:30 · administration and foundations
  - 10:40-13:00 · requirements and Activity 1
  - 14:00-15:20 · Activity 2, methods and evidence
  - 15:30-18:00 · Activities 3-4 and recap

Day 2

- Day 2 · Evidence, findings, corrective action, change and audit follow-up
  - 9:00-10:30 · findings and nonconformity
  - 10:40-13:00 · Activities 5-6
  - 14:00-15:20 · reporting, change and Activity 7
  - 15:30-16:00 · Activity 8 and wrap-up
  - 16:00-18:00 · WA then Case Study

© 2026 Tertiary Infotech Academy Pte Ltd

Learning Outcomes

1

LO1

Conduct ISO 9001 internal audit activities using appropriate methodologies and tools to ensure organisational compliance.

2

LO2

Analyse audit findings to identify process inefficiencies, non-compliance issues and areas for improvement.

3

LO3

Propose actionable improvement plans to mitigate identified risks and non-compliance issues.

4

LO4

Implement updated audit procedures following changes in internal compliance standards or external regulatory guidelines.

© 2026 Tertiary Infotech Academy Pte Ltd

K1-K4 · A1-A4

Skills Framework Alignment

Knowledge

- K1: Methodologies and tools for the conduct of audit activities
- K2: Interpretation and analysis of audit results
- K3: Identification of non-compliance
- K4: Internal and external compliance and regulatory guidelines

Abilities

- A1: Conduct audit activities in line with organisational compliance processes and guidelines using appropriate methodologies and tools
- A2: Analyse audit results and highlight process gaps or key instances of non-compliance
- A3: Propose improvements to compliance processes and measures that address major risks
- A4: Implement changes in audit performance in alignment with internal standards or external regulatory guidelines

© 2026 Tertiary Infotech Academy Pte Ltd

ASSESSMENT BRIEFING

Briefing for Assessment

1

Individual

No discussion; answer in your own words.

2

Open book

Use slides, Learner Guide and approved activity material only.

3

Secure

Place phones and other materials under the table; no recording.

4

Submission

Complete the provided document and upload to the LMS.

5

Competency

Every assessed K and A criterion must be Competent.

6

Rights

Re-assessment and appeal routes are available.

© 2026 Tertiary Infotech Academy Pte Ltd

FINAL ASSESSMENT

Assessment and Funding

Written Assessment

- 4 open-ended questions
- K1-K4 · 1 hour
- Open book

Case Study

- One coherent scenario
- A1-A4 · 1 hour
- Open book

Competency

- C in both instruments
- At least 75% attendance
- Funding criteria apply

© 2026 Tertiary Infotech Academy Pte Ltd

ON ASSESSMENT DAY

Assessment Flow

1. TRAQOM digital attendance
2. Assessment digital attendance
3. Sit WA then Case Study
4. Submit answers on the LMS
5. Sign Assessment Summary Record

© 2026 Tertiary Infotech Academy Pte Ltd

SELF-CONTAINED ACTIVITY PACKS

Access the Course Activities

Option A · Clone

- Open the repository link
- Copy the HTTPS clone URL
- Open the activities folder

Option B · ZIP

- GitHub · Code
- Download ZIP
- Extract and open activities/

Open the ISO 9001 activity repository

Each folder

- Detailed README.md
- Working XLSX
- Printable PDF/checklist

01

TOPIC 01

Introduction to Audit Activities and Compliance Methodologies

QMS foundations · ISO 9001:2015/Amd 1:2024 · ISO 19011:2026 · audit planning

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Topic 01 · Core Model

1

QMS logic

Customer focus, process approach, PDCA and risk-based thinking work as one management system.

2

Requirements

Use clauses 4-10 as audit criteria; interpret them in the context of the organisation's processes.

3

Audit methodology

Translate objectives, scope and criteria into a risk-based programme, plan and working documents.

4

Professional practice

Apply integrity, independence, evidence-based judgement and due professional care.

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Quality, conformity and effectiveness

1

Quality

Degree to which inherent characteristics fulfil requirements.

2

Conformity

A requirement is fulfilled; evidence must show the match.

3

Effectiveness

Planned activities are realised and intended results achieved.

4

Efficiency

Results are achieved with proportionate use of resources.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Quality, conformity and effectiveness · Auditor Lens

Apply in the audit

- Audit both implementation and results
- Follow requirements into real work
- Use customer and process measures
- Recognise effective controls

Avoid the trap

- Do not equate quality with premium grade
- A document alone is not effectiveness
- One good sample is not system proof
- Cost cutting can damage conformity

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Quality control, assurance and the QMS

1

Quality control

Operational techniques detect whether outputs meet acceptance criteria.

2

Quality assurance

Planned controls provide confidence that requirements will be fulfilled.

3

QMS

Interrelated policies, processes, roles and resources direct and control quality.

4

Internal audit

Independent assurance tests conformity and effectiveness across that system.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Quality control, assurance and the QMS · Auditor Lens

Apply in the audit

- Trace from policy to process to output
- Test preventive and detective controls
- Evaluate interfaces between functions
- Report system implications

Avoid the trap

- Inspection cannot replace process control
- The quality team does not own all quality
- Certification does not guarantee every output
- Audit is not operational supervision

© 2026 Tertiary Infotech Academy Pte Ltd

Seven quality management principles

1

Customer focus

Understand needs, fulfil requirements and monitor perception.

2

Leadership and people

Align direction, resources, competence and engagement.

3

Process and evidence

Manage connected processes and make decisions from reliable information.

4

Improvement and relationships

Learn continually and manage relevant stakeholder relationships.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Seven quality management principles · Auditor Lens

Apply in the audit

- Use principles to interpret system intent
- Ask how leadership enables quality
- Link measures to decisions
- Look for learning across boundaries

Avoid the trap

- Principles are not auditable clauses by themselves
- No fixed priority fits every organisation
- Slogans do not prove deployment
- Supplier accountability cannot be outsourced

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Process approach and system interactions

1

Purpose

Define the result and the customer or interested party served.

2

Inputs and outputs

Identify what enters, transforms and leaves the process.

3

Controls and resources

Clarify methods, competence, infrastructure, criteria and records.

4

Interfaces and measures

Manage hand-offs, ownership, risks and performance indicators.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Process approach and system interactions · Auditor Lens

Apply in the audit

- Audit in process sequence
- Trace end-to-end transactions
- Test hand-off controls
- Compare results with objectives

Avoid the trap

- Clause-by-clause interviews fragment the system
- Department boundaries hide process gaps
- Too many measures obscure performance
- Undefined ownership weakens action

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

PDCA and risk-based thinking

1

Plan

Set objectives, processes, resources, risks and controls.

2

Do

Operate processes under planned and controlled conditions.

3

Check

Monitor, measure, analyse, audit and review performance.

4

Act

Correct, improve, standardise and update the system.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

PDCA and risk-based thinking · Auditor Lens

Apply in the audit

- Use risk to set audit priority
- Test whether planned controls operated
- Compare evidence with intended results
- Follow learning into system changes

Avoid the trap

- ISO 9001 does not mandate a formal risk register
- Risk treatment should be proportionate
- Audits are only one Check mechanism
- Correction alone does not prevent recurrence

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

ISO 9000 family and current status

1

ISO 9000

Fundamentals and vocabulary that support consistent interpretation.

2

ISO 9001

Requirements for a QMS; the certifiable standard in the family.

3

ISO 9004

Guidance for sustained organisational success beyond minimum conformity.

4

ISO 19011:2026

Current guidance on audit principles, programmes, conduct and competence.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

ISO 9000 family and current status · Auditor Lens

Apply in the audit

- Audit against applicable requirements
- Use ISO 19011 as guidance
- Confirm contract/regulation versions
- Track standards transitions

Avoid the trap

- ISO 19011 is not a certification standard
- Do not audit against withdrawn editions
- Draft standards are not requirements
- Guidance does not override law or contract

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

ISO 9001:2015 and the 2024 climate amendment

1

Current edition

ISO 9001:2015 remains current on 12 August 2026.

2

Amendment 1:2024

Context consideration now explicitly includes climate-change relevance.

3

Interested parties

Relevant parties may have climate-related requirements.

4

2026 revision

The next edition is under publication and expected in September 2026.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

ISO 9001:2015 and the 2024 climate amendment · Auditor Lens

Apply in the audit

- Verify relevance was considered
- Follow relevant needs into controls
- Monitor official publication
- Plan a controlled gap review

Avoid the trap

- Do not invent a mandatory climate programme
- Do not teach draft text as final
- A one-line statement may lack evidence
- Transition rules come from official sources

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Clause structure: context to improvement

1

4-5

Context establishes the system; leadership directs and owns it.

2

6

Planning addresses risks, opportunities, objectives and changes.

3

7-8

Support enables controlled operation and product/service provision.

4

9-10

Evaluation creates evidence; improvement reacts, corrects and learns.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Clause structure: context to improvement · Auditor Lens

Apply in the audit

- Follow the PDCA logic across clauses
- Map requirements to processes
- Test interaction, not isolated ownership
- Use clause references precisely

Avoid the trap

- Clauses 1-3 provide scope and terms
- Not every requirement needs a procedure
- Applicability needs justification
- A clause checklist is only a prompt

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Context, interested parties and QMS scope

1

Issues

Determine internal and external matters relevant to QMS purpose and direction.

2

Interested parties

Identify relevant parties and relevant requirements.

3

Climate relevance

Explicitly decide whether climate change is a relevant issue.

4

Scope

Define boundaries, applicability, products/services and justification.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Context, interested parties and QMS scope · Auditor Lens

Apply in the audit

- Review evidence of monitoring and review
- Test how needs become requirements
- Visit physical and virtual boundaries
- Challenge unsupported non-applicability

Avoid the trap

- Long stakeholder lists may add no value
- Scope must match actual operations
- Outsourced work remains controlled
- Marketing scope and certified scope may differ

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Leadership, policy and responsibilities

1

Accountability

Top management remains accountable for QMS effectiveness.

2

Integration

QMS requirements should operate through business processes.

3

Policy

Direction must suit purpose, support objectives and commit to improvement.

4

Roles

Responsibilities and authorities must be assigned and understood.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Leadership, policy and responsibilities · Auditor Lens

Apply in the audit

- Seek evidence in decisions and resources
- Interview process owners
- Trace policy into objectives
- Test escalation authority

Avoid the trap

- A signed policy is not leadership
- Management representative ownership can mask gaps
- Conflicting targets undermine quality
- Unclear deputies create control failures

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Planning risks, objectives and change

1

Risks and opportunities

Address factors that can affect intended QMS results.

2

Quality objectives

Set relevant, measurable objectives and monitor progress.

3

Action planning

Define what, resources, owner, timing and evaluation.

4

Change planning

Protect QMS integrity by considering purpose, consequences, resources and roles.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Planning risks, objectives and change · Auditor Lens

Apply in the audit

- Trace risks into operational controls
- Test objective data definitions
- Review overdue actions
- Sample a recent planned change

Avoid the trap

- Risk registers without action are weak
- Targets can drive unintended behaviour
- Changing a form is not change management
- Opportunities need prioritisation too

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Audit types, roles and independence

1

First party

Internal audit performed for the organisation's own assurance.

2

Second party

Customer or other interested-party audit of a provider.

3

Third party

Independent certification or conformity-assessment audit.

4

Audit team

Leader, auditors and technical experts collectively provide competence.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Audit types, roles and independence · Auditor Lens

Apply in the audit

- Match competence to scope
- Avoid auditing one's own work
- Declare conflicts
- Use experts without delegating judgement

Avoid the trap

- Internal does not mean informal
- Independence is more than reporting line
- Technical expertise is not audit competence
- Observers must not influence evidence

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Audit principles and professional conduct

1

Integrity

Work ethically, honestly and responsibly.

2

Fair presentation

Report truthfully, accurately and with unresolved views visible.

3

Due professional care

Apply diligence and judgement proportionate to importance and risk.

4

Evidence and risk

Base conclusions on verifiable samples and focus effort where it matters.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Audit principles and professional conduct · Auditor Lens

Apply in the audit

- Protect confidentiality
- Maintain independence
- Document professional judgement
- Escalate immediate risks

Avoid the trap

- Audit evidence is sampled
- Courtesy does not mean avoiding hard questions
- Confidentiality applies to digital tools
- Risk focus cannot omit required coverage

© 2026 Tertiary Infotech Academy Pte Ltd

Managing the audit programme

1

Objectives

Define what assurance and improvement value the programme should provide.

2

Risks and opportunities

Consider competence, access, technology, timing, confidentiality and change.

3

Implementation

Set methods, resources, roles, records and individual audits.

4

Monitoring

Evaluate delivery and outcomes, then improve the programme.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Managing the audit programme · Auditor Lens

Apply in the audit

- Prioritise changed and high-risk processes
- Coordinate combined audits
- Review recurring findings
- Report programme performance

Avoid the trap

- Annual repetition is not risk-based
- Completion rate alone is not effectiveness
- Under-resourced audits weaken assurance
- Remote methods need their own risk review

© 2026 Tertiary Infotech Academy Pte Ltd

Audit objectives, scope and criteria

1

Objectives

State what the audit is intended to achieve.

2

Scope

Set boundaries, locations, functions, processes and time period.

3

Criteria

Define the requirements used as the reference for evaluation.

4

Feasibility

Confirm information, cooperation, time, competence and technology are adequate.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Audit objectives, scope and criteria · Auditor Lens

Apply in the audit

- Align with programme objectives
- Name virtual locations
- Use current criteria
- Resolve conflicts before fieldwork

Avoid the trap

- Objectives are not an activity list
- Scope creep threatens depth
- Criteria can include internal requirements
- Unfeasible audits should be escalated

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1

Audit planning and working documents

1

Plan

Translate objectives and scope into timing, people, methods and logistics.

2

Document review

Understand the system and identify issues before fieldwork.

3

Checklist

Prompt process-based enquiry while allowing the trail to evolve.

4

Sampling plan

Select representative and risk-focused evidence within constraints.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Audit planning and working documents · Auditor Lens

Apply in the audit

- Sequence around process flow
- Plan opening and closing meetings
- Protect information
- Prepare contingency arrangements

Avoid the trap

- A checklist must not limit enquiry
- Copying clauses creates yes/no auditing
- Convenience samples bias conclusions
- Plans should update when evidence changes

© 2026 Tertiary Infotech Academy Pte Ltd

PRACTICE OVERVIEW

Activities · Introduction to Audit Activities and Compliance Methodologies

Activity 1

- Build a Risk-Based Internal Audit Programme
- K1 · A1 · LO1
- 75 minutes

Activity 2

- Translate a Process into an Audit Trail
- K1 · A1 · LO1
- 60 minutes

Outputs

- Detailed procedure in LG
- Workbook and PDF pack
- Evidence-based acceptance test

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1 · 75 minutes

Build a Risk-Based Internal Audit Programme

ACTIVITY 1

Learners act as the internal audit team for Meridian Precision Services and convert business context, interested-party needs and process risks into a defensible annual audit programme.

You'll build

A prioritised 12-month audit programme with objectives, scope, criteria, frequency, responsibilities and rationale.

Tools: Activity workbook · course reference pack · group review

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 1 · OVERVIEW

Build a Risk-Based Internal Audit Programme · Process

1. Read the MPS context, interested-party and risk information
2. Define two or three audit programme objectives that describe the
3. List the core and support processes
4. Select the processes to audit during the 12-month period
5. Set the proposed audit timing and frequency

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 1 · ACCEPTANCE CHECK

Build a Risk-Based Internal Audit Programme

✅ Test it

Every planned audit traces to an objective and documented risk rationale; team independence and competence are explicit; no high-risk changed process is omitted without justification.

© 2026 Tertiary Infotech Academy Pte Ltd

K1 · A1 · LO1 · 60 minutes

Translate a Process into an Audit Trail

ACTIVITY 2

Learners map MPS's order-to-delivery process and design a vertical and horizontal audit trail that follows risk, evidence and hand-offs instead of auditing clauses in isolation.

You'll build

A SIPOC-style process map, control/evidence matrix and traceable audit trail.

Tools: Process-map workbook · scenario PDF · evidence planning checklist

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 2 · OVERVIEW

Translate a Process into an Audit Trail · Process

1. Define the process purpose, customer, boundaries and intended ou
2. Identify suppliers and inputs, including customer specifications
3. Map the major process stages from enquiry review through release
4. For each stage, identify the responsible role, control, risk and
5. Mark the two interfaces most likely to allow an obsolete drawing

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 2 · ACCEPTANCE CHECK

Translate a Process into an Audit Trail

✅ Test it

The map shows clear boundaries and interfaces, and each critical audit question identifies a criterion, evidence source and trace direction.

© 2026 Tertiary Infotech Academy Pte Ltd

Recap · Introduction to Audit Activities and Compliance Methodologies

1

Explain

Customer focus, process approach, PDCA and risk-based thinking work as one management system.

2

Apply

Plan audit coverage that supports strategic priorities, compliance obligations and process risks.

3

Demonstrate

Use the process approach to turn inputs, activities, controls, outputs and interfaces into a focused audit trail.

4

Evidence

Retain the completed activity artefacts and review feedback.

© 2026 Tertiary Infotech Academy Pte Ltd

02

TOPIC 02

Analysis and Interpretation of Audit Results

Process trails · interviews · sampling · objective evidence · finding formulation

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Topic 02 · Core Model

1

Evidence

Collect records, observations and interview information that can be verified.

2

Triangulation

Corroborate important conclusions through more than one evidence source.

3

Analysis

Compare evidence with criteria, evaluate process effectiveness and separate fact from inference.

4

Finding

Write traceable findings that identify the requirement, evidence and gap without prescribing a solution.

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Audit evidence and information sources

1

Records

Retained documented information, system data, transactions and logs.

2

Interviews

Information from people who perform, manage or receive the process.

3

Observation

Direct view of work, conditions, interfaces and control operation.

4

Analysis

Patterns, reconciliations, trends and comparisons derived from reliable data.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Audit evidence and information sources · Auditor Lens

Apply in the audit

- Capture identifiers and dates
- Corroborate material statements
- Keep contemporaneous notes
- Preserve confidentiality

Avoid the trap

- Interview statements alone may be weak
- Screenshots can lack context
- Copied records can be altered
- Auditor notes must remain legible

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Interviewing for reliable evidence

1

Open

Invite a process description: what happens when an order changes?

2

Probe

Clarify who, when, why, exception and decision logic.

3

Show me

Move from explanation to verifiable demonstration or record.

4

Confirm

Restate understanding and resolve contradictions respectfully.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Interviewing for reliable evidence · Auditor Lens

Apply in the audit

- Interview where work occurs
- Use neutral wording
- Listen for hand-offs
- Close with next steps

Avoid the trap

- Leading questions bias evidence
- Why can sound accusatory
- Rapid-fire questions damage rapport
- Do not promise a finding outcome

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Sampling and audit uncertainty

1

Population

Define the complete set from which evidence could be selected.

2

Selection

Use risk, representation, randomisation or judgement deliberately.

3

Sample

Record size, period, identifiers and rationale.

4

Limitation

State what the sample supports and what remains uncertain.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Sampling and audit uncertainty · Auditor Lens

Apply in the audit

- Include recent change and exceptions
- Sample across shifts or segments
- Expand when contradictions arise
- Retain traceable sample records

Avoid the trap

- A sample is not a census
- Cherry-picking creates bias
- Small samples need cautious language
- One exception may still reveal system failure

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Triangulation and corroboration

1

Convergent evidence

Independent sources support the same conclusion.

2

Contradictory evidence

Sources disagree and require further examination.

3

Missing evidence

A claimed control cannot be demonstrated or retained.

4

Alternative explanation

Test plausible interpretations before concluding.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Triangulation and corroboration · Auditor Lens

Apply in the audit

- Compare record with actual practice
- Trace source-system data
- Reconcile dates and versions
- Seek process-owner clarification

Avoid the trap

- Agreement can still repeat one bad source
- Absence of a record is not always nonconformity
- Correlation does not prove cause
- Confirmation bias narrows enquiry

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Documented information and control

1

Maintain

Information needed to support operation, such as procedures and instructions.

2

Retain

Evidence of results achieved, such as records and approvals.

3

Create/update

Ensure identification, format, review and approval are appropriate.

4

Control

Manage access, distribution, storage, preservation, change and disposition.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Documented information and control · Auditor Lens

Apply in the audit

- Sample current and obsolete versions
- Test external documents
- Verify access and retrieval
- Review digital audit trails

Avoid the trap

- ISO 9001 does not require a quality manual
- More documents can create more risk
- Cloud access needs confidentiality control
- Retention must meet obligations

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Support processes: resources and competence

1

People

Provide persons needed for effective process and QMS operation.

2

Infrastructure/environment

Maintain facilities, technology and conditions needed for conformity.

3

Monitoring resources

Ensure equipment and methods are fit for valid results.

4

Competence/awareness

Determine needs, act, evaluate effectiveness and retain evidence.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Support processes: resources and competence · Auditor Lens

Apply in the audit

- Observe workplace conditions
- Trace competence to assigned work
- Test measurement status
- Review knowledge continuity

Avoid the trap

- Attendance is not competence
- Calibration labels are not full evidence
- Tacit knowledge can be a single point of failure
- Resource adequacy depends on results

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Operational planning and customer requirements

1

Requirements

Determine customer, implied, legal and organisational needs.

2

Review

Confirm capability and resolve differences before commitment.

3

Planning

Set criteria, resources, controls and evidence for provision.

4

Change

Update information and ensure relevant people know revised requirements.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Operational planning and customer requirements · Auditor Lens

Apply in the audit

- Trace one changed order end-to-end
- Review commitment approvals
- Test contingency controls
- Sample customer communication

Avoid the trap

- Sales promises can become requirements
- Implied use may matter
- Emergency changes still need control
- Verbal confirmation can be weak

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Design and development controls

1

Planning

Define stages, responsibilities, interfaces, reviews and resources.

2

Inputs

Ensure requirements are complete, unambiguous and adequate.

3

Controls

Use review, verification and validation for their distinct purposes.

4

Outputs/change

Meet inputs, enable provision and control later modifications.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Design and development controls · Auditor Lens

Apply in the audit

- Select a design change sample
- Trace input to output
- Verify independent review where needed
- Test change impact

Avoid the trap

- Review is not verification
- Validation focuses on intended use
- Conflicting inputs need resolution
- Software/configuration changes are design changes too

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

External-provider controls

1

Applicability

Control purchased products, outsourced processes and external provision.

2

Selection

Use defined criteria for evaluation and approval.

3

Monitoring

Use performance and risk to adjust ongoing control.

4

Communication

Ensure requirements are adequate before sending them.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

External-provider controls · Auditor Lens

Apply in the audit

- Trace a critical supplier
- Compare risk with control depth
- Review re-evaluation evidence
- Test flowed-down requirements

Avoid the trap

- Outsourcing does not transfer accountability
- Approved lists can become stale
- Price alone is insufficient
- Incoming inspection cannot fix every supplier risk

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Production and service provision

1

Controlled conditions

Use suitable instructions, people, equipment, monitoring and environment.

2

Identification/traceability

Identify outputs and preserve unique trace where required.

3

Property/preservation

Protect customer/provider property and output conformity.

4

Release/post-delivery

Authorise release and control relevant delivery, support and warranty duties.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Production and service provision · Auditor Lens

Apply in the audit

- Observe actual work
- Trace status and authority
- Sample special-process validation
- Review post-delivery feedback

Avoid the trap

- Work instructions should fit competence and risk
- Traceability is requirement-dependent
- Customer data is property
- Concession needs appropriate authority

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Monitoring, analysis and evaluation

1

What

Select performance and conformity information that supports decisions.

2

How

Use valid methods, definitions, collection and analysis.

3

When

Set timing for collection, analysis and evaluation.

4

Use

Evaluate customer satisfaction, process results, providers and action effectiveness.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Monitoring, analysis and evaluation · Auditor Lens

Apply in the audit

- Recalculate a sample KPI
- Trace data definitions
- Segment customer information
- Follow results into actions

Avoid the trap

- Vanity metrics do not support decisions
- Averages hide variation
- Targets can be gamed
- Late data limits control

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Internal audit requirement and programme

1

Planned intervals

Audit at times determined by importance, change and previous results.

2

Programme

Define frequency, methods, responsibilities, planning and reporting.

3

Objectivity

Select auditors and conduct audits impartially.

4

Response

Report results and ensure correction/corrective action without undue delay.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Internal audit requirement and programme · Auditor Lens

Apply in the audit

- Review programme rationale
- Test complete QMS coverage
- Follow overdue findings
- Retain programme and result evidence

Avoid the trap

- Certification audits do not replace internal audits
- Every process need not be annual
- Auditor rotation alone does not ensure competence
- Audit closure is not action effectiveness

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

Management review as system evaluation

1

Inputs

Use changes, performance, audit, satisfaction, provider and action information.

2

Suitability

Does the QMS still fit the organisation's context and purpose?

3

Adequacy/effectiveness

Are arrangements sufficient and achieving intended results?

4

Outputs

Decide improvements, QMS changes and resource needs.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Management review as system evaluation · Auditor Lens

Apply in the audit

- Trace inputs to decisions
- Verify top-management participation
- Review action follow-through
- Test strategic alignment

Avoid the trap

- A presentation deck alone may not show review
- Data without evaluation is not enough
- Minutes can hide decision ownership
- Review frequency should fit change and risk

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2

From evidence to audit conclusion

1

Criteria

The requirement or reference against which evidence is evaluated.

2

Evidence

Verifiable records, facts or other information relevant to criteria.

3

Finding

Evaluation result: conformity, nonconformity or other defined outcome.

4

Conclusion

Overall outcome after considering objectives and all findings.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

From evidence to audit conclusion · Auditor Lens

Apply in the audit

- Calibrate team findings
- Consider positive evidence
- State scope limitations
- Answer each audit objective

Avoid the trap

- Findings are not causes
- Conclusions should not overgeneralise
- Recommendations must not compromise independence
- Disagreement should be recorded

© 2026 Tertiary Infotech Academy Pte Ltd

PRACTICE OVERVIEW

Activities · Analysis and Interpretation of Audit Results

Activity 3

- Design a Clause-to-Process Audit Checklist
- K1 · K2 · A1 · A2 · LO1 · LO2
- 60 minutes

Activity 4

- Conduct an Interview and Triangulate Evidence
- K2 · A2 · LO2

K1 · K2 · A1 · A2 · LO1 · LO2 · 60 minutes

Design a Clause-to-Process Audit Checklist

ACTIVITY 3

Learners build a checklist for the MPS purchasing and supplier-control process, linking requirements, process risks, questions, samples and expected evidence.

You'll build

A process-based audit checklist and sampling plan ready for field use.

Tools: Checklist workbook · printable checklist PDF · clause map

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 3 · OVERVIEW

Design a Clause-to-Process Audit Checklist · Process

1. Review the supplier-control process and identify the intended ou
2. Select the relevant requirement themes: approval criteria, selec
3. Convert each requirement theme into an open audit question linke
4. Add a risk-focused follow-up question for each high-risk point
5. Define expected evidence for each question using records, interv

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 3 · ACCEPTANCE CHECK

Design a Clause-to-Process Audit Checklist

✅ Test it

The checklist follows the process, covers the relevant requirement intent, uses open questions, includes a risk-based sample and provides space for objective evidence.

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · A2 · LO2 · 75 minutes

Conduct an Interview and Triangulate Evidence

ACTIVITY 4

Learners conduct a role-play audit of document change control, capture verifiable evidence and decide what can and cannot be concluded from the sample.

You'll build

An interview plan, contemporaneous evidence notes and a triangulated evidence conclusion.

Tools: Role cards PDF · evidence log workbook · observer checklist

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 4 · OVERVIEW

Conduct an Interview and Triangulate Evidence · Process

1. Assign the four roles and read only the role card for your assig
2. The auditor prepares a short interview sequence: purpose, proces
3. Open the interview by confirming purpose, time and confidentiali
4. Ask open questions, then probe with clarify, compare, show-me an
5. Record exact identifiers, dates and observations

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 4 · ACCEPTANCE CHECK

Conduct an Interview and Triangulate Evidence

✅ Test it

The conclusion cites verifiable evidence from at least two sources, separates fact from inference and states any sampling limitation.

© 2026 Tertiary Infotech Academy Pte Ltd

Recap · Analysis and Interpretation of Audit Results

1

Explain

Collect records, observations and interview information that can be verified.

2

Apply

Create a working document that supports process-based auditing without turning the audit into a compliance questionnaire.

3

Demonstrate

Collect reliable audit evidence through professional questioning, observation, record review and corroboration.

4

Evidence

Retain the completed activity artefacts and review feedback.

© 2026 Tertiary Infotech Academy Pte Ltd

03

TOPIC 03

Risk Mitigation and Improvement Measures

Nonconformity · containment · root cause · corrective action · reporting

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3

Topic 03 · Core Model

1

Control

Prevent unintended use or delivery of nonconforming outputs and deal with consequences.

2

Cause

Distinguish correction from corrective action and test causes against evidence.

3

Priority

Use consequence, likelihood and control effectiveness to prioritise improvement.

4

Effectiveness

Confirm actions removed the cause and reduced recurrence risk before closure.

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3

Nonconforming outputs and immediate control

1

Identify

Recognise and clearly mark nonconforming output or service status.

2

Control

Prevent unintended use, release or delivery.

3

Disposition

Correct, contain, return, suspend, inform or accept by authorised concession.

4

Reverify

After correction, demonstrate conformity before release.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Nonconforming outputs and immediate control · Auditor Lens

Apply in the audit

- Trace one nonconforming output
- Confirm affected population
- Review concession authority
- Check customer notification

Avoid the trap

- Containment is not corrective action
- Rework can introduce new risk
- Concession cannot override law
- Service nonconformity also needs control

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3

A well-formed nonconformity

1

Requirement

Identify the exact applicable criterion and its intent.

2

Evidence

Cite traceable facts, samples, dates and identifiers.

3

Gap

State how the evidence does not fulfil the requirement.

4

Significance

Apply the organisation's classification method consistently.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

A well-formed nonconformity · Auditor Lens

Apply in the audit

- Use neutral language
- Keep causes out of the finding
- Make traceability reproducible
- Agree factual accuracy

Avoid the trap

- Vague words weaken action
- Opinion is not evidence
- One issue should not become many duplicate findings
- Auditors should not prescribe the fix

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3

Correction, cause and corrective action

1

Correction

Eliminate a detected nonconformity or control its immediate effect.

2

Cause analysis

Determine why the system allowed the issue to occur or escape.

3

Corrective action

Eliminate or control verified causes to prevent recurrence.

4

System update

Revise risks, processes and QMS arrangements where needed.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Correction, cause and corrective action · Auditor Lens

Apply in the audit

- Protect the customer first
- Use evidence to test causes
- Address contributing conditions
- Assign accountable actions

Avoid the trap

- Operator error is rarely a sufficient cause
- Training is not always corrective action
- Long action lists may dilute accountability
- Symptoms can recur through another pathway

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3

Root-cause analysis tools

1

5 Whys

Explore causal chains beyond the immediate event.

2

Fishbone

Consider method, people, technology, information, environment and management.

3

Timeline

Reconstruct events, decisions and control points.

4

Cause validation

Look for evidence that the proposed cause explains the failure mechanism.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Root-cause analysis tools · Auditor Lens

Apply in the audit

- Use a cross-functional team
- Separate root and contributing causes
- Test alternative explanations
- Record evidence gaps

Avoid the trap

- Stopping at the fifth why is arbitrary
- Brainstormed causes are not facts
- Blame narrows analysis
- Complex issues can have interacting causes

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3

Risk-based improvement priorities

1

Consequence

Consider customer, safety, legal, delivery, cost and reputation effects.

2

Likelihood

Use history, exposure, complexity, change and control reliability.

3

Control effectiveness

Account for prevention, detection and response capability.

4

Feasibility/value

Balance urgency, dependency, resource and expected benefit.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Risk-based improvement priorities · Auditor Lens

Apply in the audit

- Address immediate unacceptable risk
- Use transparent criteria
- Link action to strategic objectives
- Monitor residual risk

Avoid the trap

- A score does not replace judgement
- Severity and priority are different
- Easy actions can crowd out important work
- Risk acceptance needs authority

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3

Corrective-action plan quality

1

Specific

State the change, affected process and required result.

2

Owned

Assign one accountable owner with necessary authority and resources.

3

Timed

Set realistic due dates, milestones and escalation.

4

Evidenced

Define completion records and effectiveness acceptance criteria.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Corrective-action plan quality · Auditor Lens

Apply in the audit

- Review unintended consequences
- Coordinate dependent actions
- Control document changes
- Communicate affected roles

Avoid the trap

- Completion is not effectiveness
- Overdue extensions need rationale
- Action owners cannot be groups
- Closing before data matures creates false assurance

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3

Verifying effectiveness

1

Implementation

Confirm the approved action was completed as intended.

2

Outcome

Test whether the cause is controlled and recurrence risk reduced.

3

Sample

Use a defined period, population and selection appropriate to risk.

4

Decision

Close, extend, reopen, escalate or raise a new finding based on evidence.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Verifying effectiveness · Auditor Lens

Apply in the audit

- Use leading and lagging measures
- Check related processes
- Confirm no adverse effects
- Retain closure evidence

Avoid the trap

- No recurrence in a short period may mean no exposure
- Self-certification can lack independence
- A changed procedure may not be deployed
- Metrics need stable definitions

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3

Audit reporting and management action

1

Complete

Identify audit, scope, criteria, team, dates, coverage and deviations.

2

Accurate

Present findings and evidence without distortion or ambiguity.

3

Concise

Give management a clear line from assurance to priority action.

4

Controlled

Protect confidentiality, approve distribution and retain records.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Audit reporting and management action · Auditor Lens

Apply in the audit

- Balance strengths and gaps
- State sample limitations
- Prioritise risk
- Track response and follow-up

Avoid the trap

- Executive summaries should not hide detail
- Surprises at closing meetings erode trust
- Report approval cannot rewrite evidence
- Distribution should follow need-to-know

© 2026 Tertiary Infotech Academy Pte Ltd

PRACTICE OVERVIEW

Activities · Risk Mitigation and Improvement Measures

Activity 5

- Evaluate Evidence and Write Audit Findings
- K2 · K3 · A2 · LO2
- 75 minutes

Activity 6

- Build a Root-Cause and Corrective-Action Plan
- K3 · A3 · LO3
- 75 minutes

Outputs

- Detailed procedure in LG
- Workbook and PDF pack
- Evidence-based acceptance test

© 2026 Tertiary Infotech Academy Pte Ltd

K2 · K3 · A2 · LO2 · 75 minutes

Evaluate Evidence and Write Audit Findings

ACTIVITY 5

Learners examine a mixed evidence pack from MPS, decide whether each issue is conformity, nonconformity or an opportunity for improvement, and write evidence-based findings.

You'll build

A findings log containing criterion, objective evidence, statement of gap, risk significance and follow-up need.

Tools: Evidence-pack PDF · findings workbook · finding-quality checklist

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 5 · OVERVIEW

Evaluate Evidence and Write Audit Findings · Process

1. Read each evidence card and record only the facts that can be ve
2. Link each evidence item to the relevant process control and requ
3. Classify the provisional outcome as conformity, possible nonconf
4. For each possible nonconformity, identify what additional eviden
5. Write confirmed findings using four elements: requirement, objec

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 5 · ACCEPTANCE CHECK

Evaluate Evidence and Write Audit Findings

✅ Test it

Every nonconformity identifies a requirement and verifiable evidence; no finding contains an unproven cause or a mandatory solution; insufficient evidence is explicitly flagged.

© 2026 Tertiary Infotech Academy Pte Ltd

K3 · A3 · LO3 · 75 minutes

Build a Root-Cause and Corrective-Action Plan

ACTIVITY 6

Learners take one confirmed MPS nonconformity through containment, cause analysis, corrective-action design, ownership, due dates and effectiveness verification.

You'll build

A complete corrective-action record with containment, cause evidence, actions, risk review and effectiveness plan.

Tools: Corrective-action workbook · 5 Whys/fishbone prompts · printable CAPA checklist

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 6 · OVERVIEW

Build a Root-Cause and Corrective-Action Plan · Process

1. Restate the nonconformity and identify the affected outputs, cus
2. Define immediate correction and containment
3. Map the event timeline from receipt of the revised drawing to di
4. Use 5 Whys or fishbone categories to generate possible causes ac
5. Test each possible cause against evidence

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 6 · ACCEPTANCE CHECK

Build a Root-Cause and Corrective-Action Plan

✅ Test it

The plan distinguishes correction from corrective action, validates causes with evidence, assigns accountable actions and defines an objective effectiveness test.

© 2026 Tertiary Infotech Academy Pte Ltd

Recap · Risk Mitigation and Improvement Measures

1

Explain

Prevent unintended use or delivery of nonconforming outputs and deal with consequences.

2

Apply

Analyse sampled evidence, identify compliance gaps and write precise, traceable findings.

3

Demonstrate

Propose risk-based corrective actions that address verified causes and include effectiveness measures.

4

Evidence

Retain the completed activity artefacts and review feedback.

© 2026 Tertiary Infotech Academy Pte Ltd

04

TOPIC 04

Adherence to Compliance Standards

Obligations · change control · procedure updates · follow-up and continual improvement

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4

Topic 04 · Core Model

1

Obligations

Maintain a controlled view of customer, statutory, regulatory and internal requirements.

2

Change

Assess impact before changing audit criteria, tools, sampling, competence or records.

3

Deployment

Update procedures, brief auditors, manage versions and validate the revised method.

4

Follow-up

Verify implementation and effectiveness, retain evidence and feed lessons into the audit programme.

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4

Compliance obligations and audit criteria

1

External

Applicable statutory, regulatory, licence, contract and customer requirements.

2

Internal

Policies, procedures, specifications, objectives and control commitments.

3

Standards

Current adopted editions, amendments and sector-specific requirements.

4

Applicability

Evidence-based decision on which obligations affect which processes.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Compliance obligations and audit criteria · Auditor Lens

Apply in the audit

- Maintain a requirements register
- Assign monitoring owners
- Trace changes into criteria
- Sample operational compliance

Avoid the trap

- A legal register may be incomplete
- Customer requirements can change faster than standards
- Certification scope may not cover all operations
- Internal commitments are still audit criteria

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4

Monitoring change triggers

1

Standards

New editions, amendments, interpretations and transition rules.

2

Regulation

New laws, licences, regulator guidance and enforcement expectations.

3

Business

New products, markets, suppliers, technology, locations or organisation structure.

4

Performance

Complaints, incidents, audit trends and ineffective actions.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Monitoring change triggers · Auditor Lens

Apply in the audit

- Use authoritative sources
- Record publication/effective dates
- Assess relevance promptly
- Escalate urgent obligations

Avoid the trap

- News alerts are not authoritative text
- Publication and effective dates differ
- No-change decisions need evidence
- Local changes can be more important than external ones

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4

Change-impact assessment

1

Criteria

Determine what requirements and audit references change.

2

Method

Assess effects on programme, plan, sampling, evidence and reporting.

3

People

Identify competence, awareness and assignment impacts.

4

Technology/records

Review access, data integrity, cybersecurity, confidentiality and retention.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Change-impact assessment · Auditor Lens

Apply in the audit

- Map affected artefacts
- Assess transition risk
- Define owners and deadlines
- Plan validation

Avoid the trap

- Template changes alone do not deploy behaviour
- Digital tools add confidentiality risk
- Parallel versions confuse auditors
- Emergency changes still need approval

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4

Controlled procedure revision

1

Draft

Translate the change into clear, usable method and responsibilities.

2

Review/approve

Use competent authority and resolve interface impacts.

3

Release

Identify version, effective date, access and withdrawn copies.

4

Deploy

Communicate, train, configure tools and retain evidence.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Controlled procedure revision · Auditor Lens

Apply in the audit

- Pilot high-impact changes
- Brief process owners
- Update working documents
- Verify access to current version

Avoid the trap

- Emailing a procedure is not awareness
- Training attendance is not competence
- Old local copies can survive
- Uncontrolled forms undermine traceability

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4

Remote and technology-enabled auditing

1

Feasibility

Confirm connectivity, access, identity, evidence availability and cooperation.

2

Security

Protect confidential information, recordings, transfer and storage.

3

Authenticity

Confirm the source and context of screen-shared or exported evidence.

4

Coverage

Decide which objectives require physical observation or on-site access.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Remote and technology-enabled auditing · Auditor Lens

Apply in the audit

- Test tools before the audit
- Use secure transfer
- Record limitations
- Plan technical fallback

Avoid the trap

- Remote does not mean lower rigour
- Screens can hide surrounding context
- Recording may require consent
- Virtual locations belong in scope when relevant

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4

Auditor competence through change

1

Knowledge

Understand applicable standards, process, sector and obligations.

2

Skills

Plan, interview, sample, analyse, use technology and communicate.

3

Behaviour

Demonstrate ethics, observation, adaptability and sound judgement.

4

Evaluation

Use witnessed audits, records, feedback and continuing development.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Auditor competence through change · Auditor Lens

Apply in the audit

- Update competence criteria
- Use technical experts selectively
- Witness revised methods
- Record development actions

Avoid the trap

- Years of experience alone are insufficient
- Certification may not cover sector context
- Tool fluency does not prove judgement
- Competence must match assigned scope

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4

Follow-up audit decisions

1

Completion

Was each action implemented and supported by controlled evidence?

2

Effectiveness

Did the action reduce recurrence risk and achieve the intended result?

3

Sufficiency

Is the sample and elapsed time enough for a reliable decision?

4

Escalation

What happens if action is late, ineffective or creates a new risk?

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Follow-up audit decisions · Auditor Lens

Apply in the audit

- Plan proportionate follow-up
- Sample affected outputs
- Review trend data
- Record closure rationale

Avoid the trap

- Desk review may miss operational failure
- Closure dates should not drive weak decisions
- Repeat findings indicate system weakness
- Escalation should be pre-defined

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4

Continual improvement of the audit programme

1

Performance

Monitor delivery, coverage, timeliness, recurrence and stakeholder usefulness.

2

Feedback

Use auditor, auditee and management insight without compromising independence.

3

Learning

Analyse calibration, complaints, missed risks and technology experience.

4

Action

Revise priorities, methods, competence and resources through PDCA.

© 2026 Tertiary Infotech Academy Pte Ltd

APPLICATION AND JUDGEMENT

Continual improvement of the audit programme · Auditor Lens

Apply in the audit

- Review programme KPIs
- Analyse systemic trends
- Share lessons across teams
- Report improvement value

Avoid the trap

- More findings do not mean better audits
- Satisfaction alone does not prove rigour
- Repeated templates can fossilise thinking
- Improvement actions need effectiveness checks

© 2026 Tertiary Infotech Academy Pte Ltd

PRACTICE OVERVIEW

Present an Audit Report and Improvement Priorities

ACTIVITY 7

Learners consolidate MPS audit evidence into an executive-ready report and closing-meeting briefing that is accurate, concise, balanced and actionable.

You'll build

An audit report, improvement-priority matrix and five-minute closing-meeting briefing.

Tools: Audit-report workbook · closing-meeting checklist · presentation cue cards

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 7 · OVERVIEW

Present an Audit Report and Improvement Priorities · Process

1. Confirm the audit objectives, scope, criteria, dates, team and a
2. Summarise the process coverage and sample limitations so readers
3. Consolidate conformities, nonconformities and opportunities for
4. Write an audit conclusion that answers the audit objectives with
5. Prioritise improvement opportunities using risk, customer impact

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 7 · ACCEPTANCE CHECK

Present an Audit Report and Improvement Priorities

✅ Test it

The report is complete, traceable and balanced; conclusions stay within scope; priorities have a transparent rationale; follow-up responsibilities and dates are clear.

© 2026 Tertiary Infotech Academy Pte Ltd

K4 · A4 · LO4 · 60 minutes

Update Audit Procedures and Verify Follow-Up

ACTIVITY 8

Learners respond to three change triggers, update the MPS audit method, plan auditor deployment and conduct a follow-up review of the drawing-control corrective action.

You'll build

A change-impact assessment, revised audit-procedure plan, competence/communication plan and follow-up verification record.

Tools: Change-control workbook · procedure-change checklist PDF · follow-up evidence pack

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 8 · OVERVIEW

Update Audit Procedures and Verify Follow-Up · Process

1. Log each change trigger with its source, effective date, owner a
2. Assess impact on audit objectives, criteria, programme, plan, wo
3. Prioritise the changes by compliance urgency, risk and operation
4. Define the required procedure revisions and identify the control
5. Assign approval, version control, communication, training and sy

© 2026 Tertiary Infotech Academy Pte Ltd

ACTIVITY 8 · ACCEPTANCE CHECK

Update Audit Procedures and Verify Follow-Up

✅ Test it

Every change has an applicability decision and controlled implementation path; the follow-up decision is based on evidence of both completion and effectiveness.

© 2026 Tertiary Infotech Academy Pte Ltd

Recap · Adherence to Compliance Standards

1

Explain

Maintain a controlled view of customer, statutory, regulatory and internal requirements.

2

Apply

Communicate balanced audit conclusions and propose practical improvements that address priority risks.

3

Demonstrate

Implement controlled changes to audit procedures and verify corrective-action effectiveness after standards, regulations or internal controls change.

4

Evidence

Retain the completed activity artefacts and review feedback.

COURSE OUTCOMES

What You Achieved

1

LO1

Conduct ISO 9001 internal audit activities using appropriate methodologies and tools to ensure organisational compliance.

2

LO2

Analyse audit findings to identify process inefficiencies, non-compliance issues and areas for improvement.

3

LO3

Propose actionable improvement plans to mitigate identified risks and non-compliance issues.

4

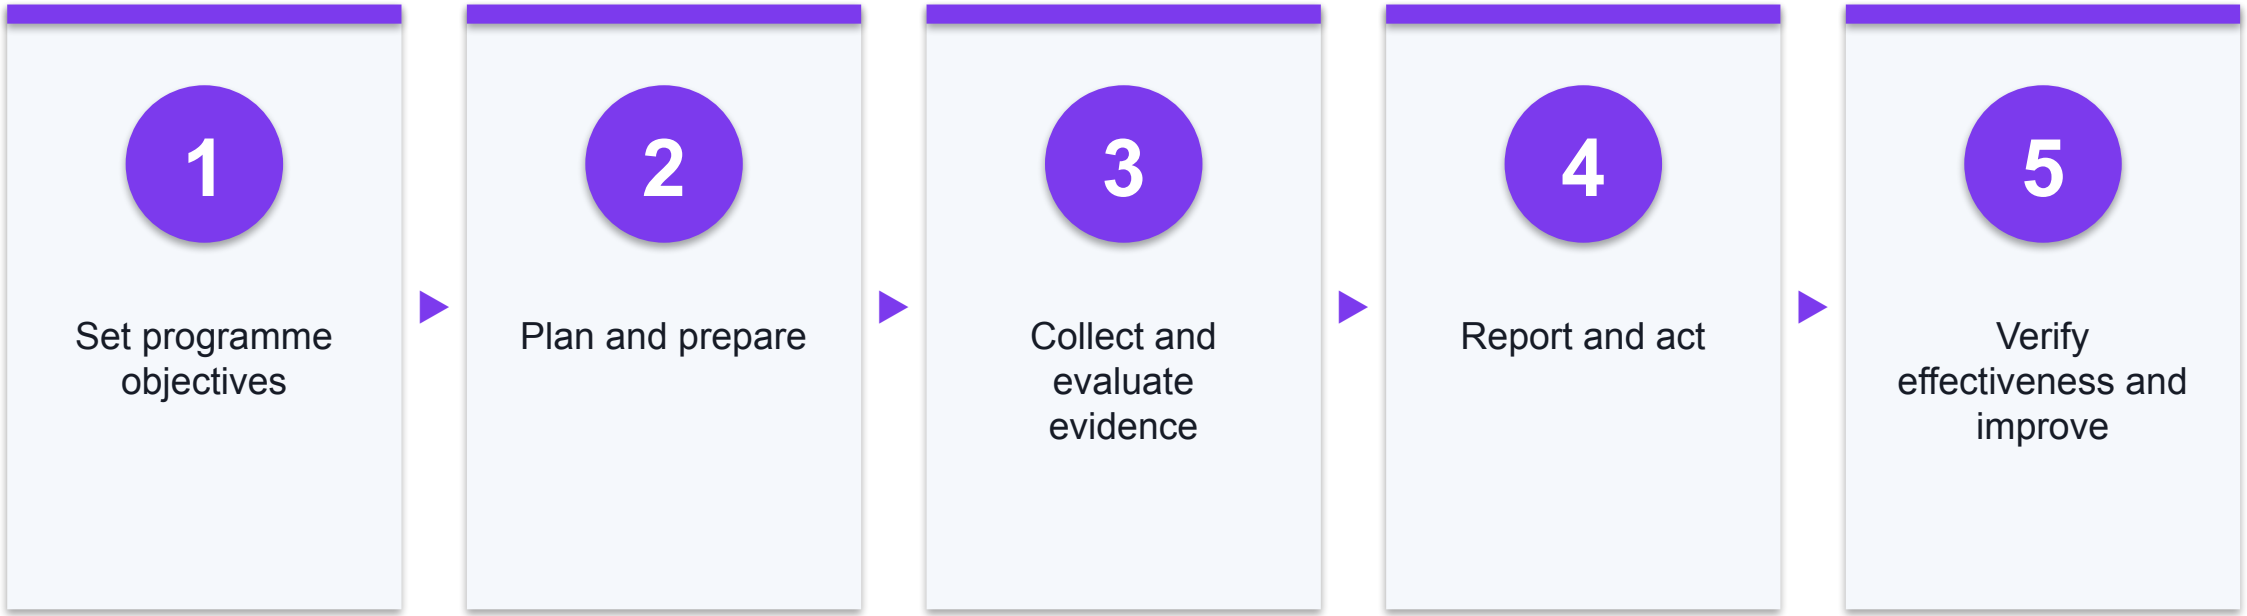

LO4

Implement updated audit procedures following changes in internal compliance standards or external regulatory guidelines.

THANK YOU

Audit for confidence, not paperwork.

Use evidence to help the organisation protect conformity, improve performance and learn.
