ACTIVITY 7

Present an Audit Report and Improvement Priorities

ISO 9001 Quality Management System (QMS) Internal Auditor Training
TGS-2023039341 · K2 · K4 · A3 · LO3 · 60 minutes

Objective

Communicate balanced audit conclusions and propose practical improvements that address priority risks.

Scenario

The MPS audit is complete. Evidence shows effective calibration control and strong complaint response, plus gaps in supplier re-evaluation, drawing change deployment and corrective-action effectiveness. Senior management wants a clear view of assurance, risk and action priorities.

Materials

- Consolidated findings from Activities 3-6
- Audit objectives, scope, criteria and plan
- Report template and improvement-priority matrix

Activity questions

- What conclusion is supported about QMS conformity and effectiveness within the audit scope?
- Which positive practices should be reported to preserve a balanced view?
- Which improvements offer the highest risk reduction and business value?
- What should be agreed at the closing meeting without compromising auditor independence?

Required evidence

- Audit report
- Improvement-priority matrix
- Closing-meeting checklist
- Agreed follow-up record

Detailed Procedure

1. Confirm the audit objectives, scope, criteria, dates, team and any deviations from the plan.

2. Summarise the process coverage and sample limitations so readers understand the boundaries of assurance.

3. Consolidate conformities, nonconformities and opportunities for improvement; remove duplicates and inconsistent terminology.

4. Write an audit conclusion that answers the audit objectives without claiming certainty beyond the sample.

5. Prioritise improvement opportunities using risk, customer impact, feasibility and dependency.

6. Describe recommended directions or desired outcomes without designing management's corrective action for it.

7. Prepare a closing-meeting sequence: appreciation, objectives/scope, positive practices, findings, conclusion, next steps and questions.

8. Role-play the briefing. The auditee may seek clarification but the evidence and criterion should remain the basis of the finding.

9. Record agreed correction/corrective-action response dates, report distribution and follow-up arrangements.

Acceptance Check

The report is complete, traceable and balanced; conclusions stay within scope; priorities have a transparent rationale; follow-up responsibilities and dates are clear.
